Girls Growing Up in Late Victorian and Edwardian England Carol Dyhouse 2012-12-12
Girls learn about "femininity" from childhood onwards, first through their relationships in the family, and later from their teachers and peers. Using sources which vary from diaries to Inspector's reports, this book studies the socialization of middle- and working-class girls in late Victorian and early-Edwardian England. It traces the ways in which schooling at all social levels at this time tended to reinforce lessons in the sexual division of labour and patterns of authority between men and women, which girls had already learned at home. Considering the social anxieties that helped to shape the curriculum offered to working-class girls through the period 1870-1920, the book goes on to focus on the emergence of a social psychology of adolescent girlhood in the early-twentieth century and finally, examines the relationship between feminism and girls' education.

From Workshop to Waste Magnet Diane Sicotte 2016-09-21 Like many industrialized regions, the Philadelphia metro area contains pockets of environmental degradation: neighborhoods littered with abandoned waste sites, polluting factories, and smoke-belching incinerators. However, other neighborhoods within and around the city are relatively pristine. This eye-opening book reveals that such environmental inequalities did not occur by chance, but were instead the result of specific policy decisions that served to exacerbate endemic classism and racism. *From Workshop to Waste Magnet* presents Philadelphia's environmental history as a bracing case study in mismanagement and injustice. Sociologist Diane Sicotte digs deep into the city's past as a titan of American manufacturing to trace how only a few communities came to host nearly all of the area's polluting and waste disposal land uses. By examining the complex interactions among economic decline, federal regulations, local politics, and shifting ethnic demographics, she not only dissects what went wrong in Philadelphia but also identifies lessons for environmental justice activism today. Sicotte's research tallies both the environmental and

social costs of industrial pollution, exposing the devastation that occurs when mass quantities of society's wastes mix with toxic levels of systemic racism and economic inequality. *From Workshop to Waste Magnet* is a compelling read for anyone concerned with the health of America's cities and the people who live in them.

The Middle Class in World Society Christian Suter 2020-05-21 This volume delves into the study of the world's emerging middle class. With essays on Europe, the United States, Africa, Latin America, and Asia, the book studies recent trends and developments in middle class evolution at the global, regional, national, and local levels. It reconsiders the conceptualization of the middle class, with a focus on the diversity of middle class formation in different regions and zones of world society. It also explores middle class lifestyles and everyday experiences, including experiences of social mobility, feelings of insecurity and anxiety, and even middle class engagement with social activism. Drawing on extensive fieldwork and in-depth interviews, the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates. It will be of importance to students and researchers of

sociology, economics, development studies, political studies, Latin American studies, and Asian Studies.

The Future of Work Adalberto Perulli 2020-12-10 *Studies in Employment and Social Policy* Volume 56 Digitalization, far from being solely a technological issue, has broad implications in the social, labour, and economic spheres. It leads to dangers as well as to new chances for the workforce, and thus labour law must develop effective ways to both protect workers and allow them to profit from new technological developments. The most thorough book of its kind, this collection of expert essays provides an abundance of well-thought-out material for understanding the consequences of digitalization for the labour market and industrial relations. Recognizing that only an international perspective can make it possible to face the challenges of the present (and the future), renowned authorities from the International Labour Organization and the International Society for Labour and Social Security Law, as well as outstanding labour law professors, examine in depth such salient issues as the following: transformation of production systems; the spread of artificial intelligence; precariousness and exploitation in the gig economy; lessons learned from COVID-19; employment status of platform workers; new cross-border issues; rights to trade union association and collective bargaining; role of the State in the new digital labour market; and blurred lines between work and private life. Thanks to the international team of contributors, the issues are dealt with from a variety of overlapping perspectives and points of view, combining aspects of labour law, commercial law, corporate governance, and international law. Highlighting the need to adapt, especially through the right to training, work, and professionalism with respect to the new technological landscape, the book draws on legislative, judicial, and theoretical initiatives suggesting ways of responding positively to the requests for protection that arise in the new forms of production. A uniquely valuable tool for study and reflection for policymakers and

academics, the book is also sure to be valued by entrepreneurs, managers, consultants, corporate lawyers, judges, human rights experts, and trade unionists who are interested in the issues of labour, industrial relations, and social rights in European and international contexts.

Routledge Revivals: Localities (1989) Philip Cooke 2016-09-19 First published in 1989, this book examines seven different localities, ranging from the outer suburbs of large northern cities to small freestanding town, which were prospering in the 1980s or struggling against the negative employment effects of restructuring. Within the theoretical frame of 'industrial restructuring', it traces the development of each locality, exploring in depth the influence of several key elements — deindustrialisation, technological change, the shift to the services in employment — on social composition, political change and local policy. A major contribution to locality studies, this book is essential reading for students of urban and regional studies, and sociology.

The Musical Times 1904

Inequality and Inclusive Growth in Rich Countries Brian Nolan 2018-06-04 Rising inequality in income and wealth across the OECD has been widely recognised and identified as a major concern; Inequality and Inclusive Growth in Rich Countries links this phenomenon

with stagnation in wages and incomes for ordinary working households in order to address the challenge of promoting growth and prosperity. The concentration of wealth at the top of society is now seen as a threat to social and political stability. Inequality and Inclusive Growth in Rich Countries aims to identify what structures and policies are associated with success or failure in limiting the rise in inequality and promoting income growth for those in the middle and lower reaches of the income distribution. It analyses the varying experiences of ten rich countries over recent decades in depth, revealing that there are indeed responses that governments and societies can adopt, and that stagnation and rising inequality do not have to be accepted, but can be combatted given the political will and capacity.

Thorstein Veblen, John Dewey, C. Wright Mills and the Generic Ends of Life Rick Tilman 2004 Although Veblen, Dewey, and Mills disagreed on a number of points, Rick Tilman shows how these thinkers forged an authentic, coherent, and original tradition of critical social science in the United States. By comparing their views on a number of timely issues such as aesthetics, feminism, and gambling, the author shows how their tradition is vibrantly relevant in the new millenium.

From Crawley to Carlisle Chris Upfield 2017-01-11 From Crawley to Carlisle: A Trawl Around League Two invites readers to join the author, Chris Upfield, and the friends and family who accompany him to far-flung places in the pursuit of football happiness in this semi-autobiographical experience of the life of a lower league football supporter. Chris writes a sardonic and often hilarious examination of modern football culture, from the players, supporters and songs to the grounds and lower-league hospitality. The reader can experience the nostalgia of flashbacks to the 60s, 70s and 80s from ice cream soda to subbuteo, and laugh at the writer's middle aged frustrations at the vagaries of everything from train journeys to motorway gantries. In addition to this, the reader is taken to cities of culture like York, Oxford and Cambridge and the less celebrated Carlisle, Mansfield and Crawley. Alongside this football theme, Chris also gives his own

observations of modern life more generally. Inspired by Louis de Bernières and Bill Bryson, From Crawley to Carlisle: A Trawl Around League Two takes football away days as its theme and will appeal to football fans. The book is also a compendium of the author's quirky imagination upon modern culture, and the things which trigger those thoughts along the way. It will suit readers of autobiographical and observational works with a similar cynical sense of humour and a passing interest in football.

Amy Dillwyn David Painting 2013-09-15 This is a new edition of David Painting's biography of Amy Dillwyn, first published in 1987. This is a very accessible biography of a remarkable woman, Amy Dillwyn (1845 - 1935); who was born into one of Swansea's most distinguished families, and became a leading industrialist and also novelist. Based largely on her diaries, it traces the life of a woman of exceptional spirit and personality who inherited her father's bankrupt business but learnt to make her way in a man's world.
