The Slump John Stevenson 2013-10-18 'One of the most relentlessly brilliant studies of twentieth-

century Britain ... these young historians have found a marvellous theme and stuck to it. Theirs is the glory!' Professor Arthur Marwick, History

The 1930s - remembered as the decade of dole queues and hunger marches, mass unemployment, the means test, and the rise of fascism - also saw the development of new industries, the growth of comfortable suburbia, and rising standards of living for many. In Britain in the Depression, the authors look behind the legends for an objective - and timely - reassessment, as Britain again struggles with the economic and spiritual ills of recession and unemployment.

2015 ICD-10-CM Draft Edition - E-Book Carol J. Buck 2015-01-01 Code more efficiently and accurately with Carol J. Buck's 2015 ICD-10-CM Draft Edition. Designed by coders for coders, this reference combines Netter's Anatomy illustrations

and the Official Guidelines for Coding and Reporting. It simplifies ICD-10 coding to ensure the most accurate billing and optimal reimbursement for hospital inpatient or outpatient medical services. Full-color images and clear explanations of A&P, pathology, and medical terminology make it easy to develop the knowledge needed to assign the appropriate ICD-10-CM codes. Placeholder X symbol reminds users to assign placeholder X for codes less than 6 characters that require a 7th character. CC (Complications & Comorbidities) and MCC (Major CC) symbols identify codes associated with the

presence of secondary diagnoses from MS-DRGs and call attention to CC and MCC exceptions. Present on Admission symbol identifies the diseases that will always be coded as present on admission. Hospital Acquired Condition symbol notes specific conditions that will always be coded as hospital acquired. UNIQUE! Full-color Netter's anatomy art is cross-referenced within the Tabular List to help you understand anatomy and how it will affect choosing codes. Over 150 full-color illustrations provide visual orientation and help you understand difficult terminology, diseases/conditions, or coding in a specific

category. Official Guidelines for Coding and Reporting (OGCRs) are listed in full and also integrated within the code set, providing fast, easy access to the official coding rules.

Numerous Items are included in the Tabular List, helping you code more accurately with detailed information on common diseases and conditions.

American Hospital Association's Coding Clinic® citations provide reference information regarding official ICD-10-CM coding advice that will enhance your understanding of specific codes.

Symbols and highlights show which codes are an Unacceptable Principle Diagnosis, identify codes

that call for the use of additional character(s), and highlight Excludes1 and Excludes2, Includes, Use Additional, Code First, Code Also, and Unspecified. Age and Sex edits from the Definition of Medicare Code Edits denote codes that are used only with patients of a specific age or sex, helping to ensure accurate reporting.

Manifestation code symbol spotlights certain conditions for which it is important to record the etiology (cause) and the manifestation (symptom) of the disease. Additional elements within specific codes define terms and supply additional coding instruction to aid in understanding difficult

terminology, diseases and conditions, or coding in a specific category. Codingupdates.com companion website includes updates to the ICD-10 codes needed for diagnosis coding. Full-color format includes consistent color-coded symbols, and is specifically designed to meet the needs of hospital inpatient, outpatient, and professional coding.

Pediatric Surgery Emmanuel A. Ameh 2020-11-23

The second, fully updated edition of this book applies and contextualizes up-to-date information on pediatric surgery for low and middle-income

countries (LMICs). The book is organized in general anatomic and thematic sections within pediatric surgery, such as urology, oncology, orthopedics and gastroenterology and includes chapters addressing the unique challenges and approaches for pediatric surgery in low-resource settings. Each chapter has dual authorship LMIC author providing context-specific insights and authors from high-income countries (HICs) contributing experience from well-resourced settings. Written in a reader-friendly format, this book has a uniform structure in each chapter, with introduction, demographics, etiology,

pathophysiology, clinical presentations, investigations, management, outcome, prevention, ethics, evidence-based surgery and references. This comprehensive volume fills the gap between up-to-date pediatric surgical scholarship and knowledge developed and applied in HICs, and the practical needs of practitioners in low-resource settings. This is an indispensable guide for postgraduate surgical trainees in Africa and other LMICs as well as general surgeons practicing in Africa and other LMICs, who need to care surgically for children.

Swaiman's Pediatric Neurology E-Book Kenneth F. Swaiman 2017-09-21 Since 1975, Dr. Kenneth Swaiman's classic text has been the reference of choice for authoritative guidance in pediatric

neurology, and the 6th Edition continues this tradition of excellence with thorough revisions that bring you fully up to date with all that's new in the field. Five new sections, 62 new chapters, 4 new editors, and a reconfigured format make this a comprehensive and clearly-written resource for the experienced clinician as well as the physician-in-training. Nearly 3,000 line drawings, photographs, tables, and boxes highlight the text, clarify key concepts, and make it easy to find information quickly. New content includes 12 new epilepsy chapters, 5 new cerebrovascular chapters, and 13 new neurooncology chapters, as

well as new chapters on neuroimmunology and neuromuscular disorders, as well as chapters focused on clinical care (e.g., Counseling Families, Practice Guidelines, Transitional Care, Personalized Medicine, Special Educational Law, Outcome Measurements, Neurorehabilitation, Impact of Computer Resources, and Training Issues). Additional new chapters cover topics related to the developmental connectome, stem cell transplantation, and cellular and animal models of neurological disease. Greatly expanded sections to increase your knowledge of perinatal acquired and congenital disorders,

neurodevelopmental disabilities, pediatric epilepsy, and nonepileptiform paroxysmal disorders and disorders of sleep. Coverage of new, emerging, or controversial topics includes developmental encephalopathies, non-verbal learning disorders, and the pharmacological and future genetic treatment of neurodevelopmental disabilities.

Dialects Across Borders Markku Filppula

2005-12-21 Nonstandard varieties of languages have recently become an object of new interest in scholarly research. This is very much due to the

advances in the methods used in data collection and analysis, as well as the emergence of new language-theoretical frameworks. The articles in this volume stem from the 11th International Conference on Methods in Dialectology (Methods XI, August 2002, Joensuu). The theme for this conference was “Dialects across borders”. The selection of contributions included in this volume demonstrates how various kinds of borders exert major influence on linguistic behaviour all over the world. The articles have been grouped according to whether they deal primarily with the linguistic outcomes of political and historical borders

between states (Part I); various kinds of social and regional boundaries, including borders in a metaphorical sense, i.e. social barriers and mental or cognitive boundaries (Part II); and finally, boundaries between languages (Part III).

Scotland's Populations from the 1850s to Today

Michael Anderson 2018-03-01 Scotland's

Populations is a coherent and comprehensive description and analysis of the most recent 170 years of Scottish population history. With its coverage of both national and local themes, set in the context of changes in Scottish economy and society, this study is an essential and definitive source for anyone teaching or writing on modern Scottish history, sociology, or geography. Michael Anderson explores subjects such as population

growth and decline, rural settlement and depopulation, and migration and emigration. It sets current and recent population changes in their long-term context, exploring how the legacies of past demographic change have combined with a history of weak industrial investment, employment insecurity, deprivation, and poor living conditions to produce the population profiles and changes of Scotland today. While focussing on Scottish data, Anderson engages in a rigorous treatment of comparisons of Scotland with its neighbours in the British Isles and elsewhere in Europe, which

ensures that this is more than a one-country study.

Tabloid Television John Langer 2006-10-19 Fires, floods, accidents, celebrity lifestyles, heroic acts of humble people, cute acts by family pets and the weather. Television's non-news about non-events takes up an increasingly large part of contemporary broadcast journalism, but is regularly dismissed by television pundits as having no place on our screens. To its critics, this 'other news' distracts our attention with trivialities and entertainment values, and undermines

journalism's relationship with the workings of democracy. Yet, in spite of these protests, this 'lite news' remains as entrenched and as popular as ever. In *Tabloid Television*, John Langer argues that television's 'other news' must be recognised as equally important as 'hard news' in the building of a genuinely comprehensive study of broadcast journalism. Using narrative analysis, theories of ideology, concepts from genre studies and detailed textual readings, 'other news' is explored as a cultural discourse connected with storytelling, gossip, social memory, the horror film, national identity and the cult of fame. Langer's

study also examines the political role played by an allegedly non-political news and explores the links between this type of news and recent broadcasting trends towards 'reality television'. *Tabloid Television*, *Popular Journalism and the 'Other News'* provides an eclectic and intriguing look at one of the most maligned areas of television news. By offering an extended and thoroughly grounded analysis of actual news stories, John Langer locates the question of representational power as one of the central concerns of the media studies agenda and offers some interesting speculation about where

television news may be heading.

Look Up Glasgow Adrian Searle 2013-10-07

Glasgow is Scotland's largest city, its streets a constant frenetic bustle of activity. But rarely do its residents take the time to stop and look up at the extraordinary architectural heritage all around. Glasgow's 'no mean city' image belies this world-class architectural detail, comprising of stunning sculpture, ornament, friezes, gables and decoration, the vast majority of which are hidden in plain sight above eye level. Writer Adrian Searle and specialist architectural photographer David Barbour have scoured the city, bringing together in one volume a fabulous record of the

hidden jewels of 'the second city of the Empire', created in a time of great wealth and virtuoso craftsmanship now long gone. The book also includes poetry from six of Scotland's leading poets, responding in very individual ways to Glasgow's extraordinary built environment. Look Up Glasgow will be a beautiful surprise to residents, visitors and non-residents of Glasgow alike, demonstrating that it is much more than just another post-industrial British city. It will be a book that those passionate about the city and of architecture will treasure.

Handbook of Neuroemergency Clinical Trials

Wayne M. Alves 2006-01-18 During the 1990's, scientific advances in understanding the mechanisms and pathophysiology of acute central

nervous system injury were offset by a history of disappointing results from Phase III clinical trials of novel neuroprotective drugs. Numerous novel compounds were “tested, and seemingly fell by the wayside. This book is intended to focus on novel therapies and the unique challenges their intended targets pose for the design and analysis of clinical trials. The authors explore the issues facing research in this area and the strategies that might lead to future success in this critical area of unmet medical need. It represents a compendium of information gained from over 20 years of clinical trial experience in areas of acute

neurology and neurosurgery. From the knowledge of clinical assessment using standardized tools, to the intricate design of difficult hyper-acute neuroemergencies trials, the reader will benefit from the authors' perspectives. * Presents new perspectives on acute neuroemergency clinical trials * Includes insights from clinical pharmacology and industry perspectives *

Discusses historical lessons learned from early and recent trials in acute neuroscience populations

Girl in Pieces Kathleen Glasgow 2016-08-30 Fans
of Girl, Interrupted, Thirteen Reasons Why, and
All the Bright Places will love this New York
Times bestseller. "A haunting, beautiful, and
necessary book that will stay with you long after
you've read the last page."—Nicola Yoon, #1 New
York Times bestselling author of Everything,
Everything and The Sun Is Also a Star Charlotte
Davis is in pieces. At seventeen she's already

lost more than most people do in a lifetime. But she's learned how to forget. The broken glass washes away the sorrow until there is nothing but calm. You don't have to think about your father and the river. Your best friend, who is gone forever. Or your mother, who has nothing left to give you. Every new scar hardens Charlie's heart just a little more, yet it still hurts so much. It hurts enough to not care anymore, which is sometimes what has to happen before you can find your way back from the edge. A deeply moving portrait of a girl in a world that owes her nothing, and has taken so much, and the journey she undergoes to

put herself back together. Kathleen Glasgow's debut is heartbreakingly real and unflinchingly honest. It's a story you won't be able to look away from. "Girl, Interrupted meets Speak."—Refinery29 "A dark yet powerful read."—Paste Magazine "One of the most affecting novels we have read."—Goop "Breathtaking and beautifully written."—Bustle "Intimate and gritty."—The Irish Times And don't miss Kathleen Glasgow's newest novel How to Make Friends with the Dark, which Karen M. McManus, the New York Times bestselling author of One of Us Is Lying, calls "rare and powerful."

Sport in the City Chris Gratton 2002-09-09 Cities now seek to attract major sporting events and activities to re-image themselves, and frequently invest in community sports development to fund economic growth and regeneration. Including a range of case-studies from global (the Sydney Olympics) to local (urban school sports), this book

looks closely at how sport has been used in contemporary cities across the world, and evaluates policies, strategies and management. Five key areas are examined: * sport and urban economic regeneration * sports events: bidding * planning and organization * Urban Sports tourism * Sport and urban community development * Urban politics and sports policy. *Sport in the City* therefore represents an essential resource for urban policy makers and the sports policy community. It will be invaluable reading for sports studies students and urban geographers.
